## Fiscal Year 2021 Formerly Used Defense Sites (FUDS) Official Workplan

**WORKPLAN OVERVIEW:** The Fiscal Year 2021 Formerly Used Defense Sites (FUDS) Official Workplan identifies the projects and activities within the FUDS program that may receive FY21 funding. Below is a listing of all planned projects as of 30 SEPT 2020.

The workplan is not considered final and may be amended throughout the year to include additional projects. The workplan will be adjusted to increase funding to specific, vetted Military Munitions Response Program (MMRP) projects, if additional funding is received in FY21.

For questions about workplan updates contact:

**FUDS PROGRAM BACKGROUND:** Established by Congress in the mid-1980s, the FUDS Program addresses properties formerly owned by, leased to or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense prior to October 1986. The Army is the DOD Lead Agent for FUDS, and the Secretary of the Army has delegated the mission execution for FUDS to the Commanding General of the U.S. Army Corps of Engineers (USACE).

Under Army and DoD oversight, USACE executes the program pursuant to DOD policies, most applicably, the Defense Environmental Restoration Program (DERP) Manual (DoDM 4715.20). FUDS program execution includes identifying eligible properties, investigating their condition and addressing any hazardous substances, pollutants or contaminants resulting from DoD activities. Properties eligible for FUDS are currently owned by non-DOD entities such as private individuals or federal, state, tribal, or local government entities. Teams from USACE districts consult with state environmental and health offices, the U.S. Environmental Protection Agency, landowners and the public.
